Digital Pneumatic Sand Squeezer

This instrument was designed to mimic the compressing action of an automatic molding machine in order to measure the effects the sand has upon its compactionabilities. Also, the device prepares standard 2" x 2" AFS or 50mm x 50mm metric sand specimens. The standard sand specimen is used in various tests including permeability, compressive strength, shear strength, etc.

Universal Sand Strength Machine

For the determination of the compressive strength sD up to approx. 30 N/cm². 230 V, 50 Hz.
